

Network Impressions

DESCRIPTION: 'Network Impressions' is an electro-acoustic improvisational chorale for SATB, live electronics and interactive score. It was written specifically for my vocal ensemble Chordas, and premieres December 1st in the Wild Beast at CalArts. Harmonically, the piece is an investigation into composing with a network of equally-tempered 7-note pressing scales. Of these, there are four types as described by Dmitri Tymoczko in his article *Scale Networks and Debussy*: Diatonic, Acoustic (also called Lydian $\flat 7$ scale), Harmonic Major, and Harmonic Minor, each of which can have 12 different transpositions. The singers explore a series of 16 of these scales, flattening or sharpening a single note with each transition. They are assisted in this by an interactive score that I built in JavaScript, which also triggers electronic and recorded sounds in a concurrently running Ableton session. I chose different texts for each singer at random from the Brown University Standard Corpus of Present-Day American English, which contains 52,108 unique sentences.

Network Impressions

Nathan Turezan

The image shows a musical score for four voices: Soprano (Sop), Alto, Tenor, and Bass. The score is titled 'Network Impressions' and is by Nathan Turezan. It consists of two systems of four staves each. The first system contains measures 1 through 8, and the second system contains measures 9 through 16. Each measure is labeled with a scale name above the Soprano staff. The scales are: c_dia, f_dia, b $\flat$ _acou, c_HM, c_hm, f_acou, g_HM, g_dia in the first system; and e_hm, a_acou, d_dia, g_acou, d_hm, d_HM, b_hm, e_acou in the second system. The notation shows various note heads and accidentals (sharps, flats) on the staves, indicating the specific notes of each scale for each voice part.
