

Making Music with SNaPS (Scale Navigator Particle System)

Nathan Turczan

1 Scale Navigator Ensemble Radio 5/5/21

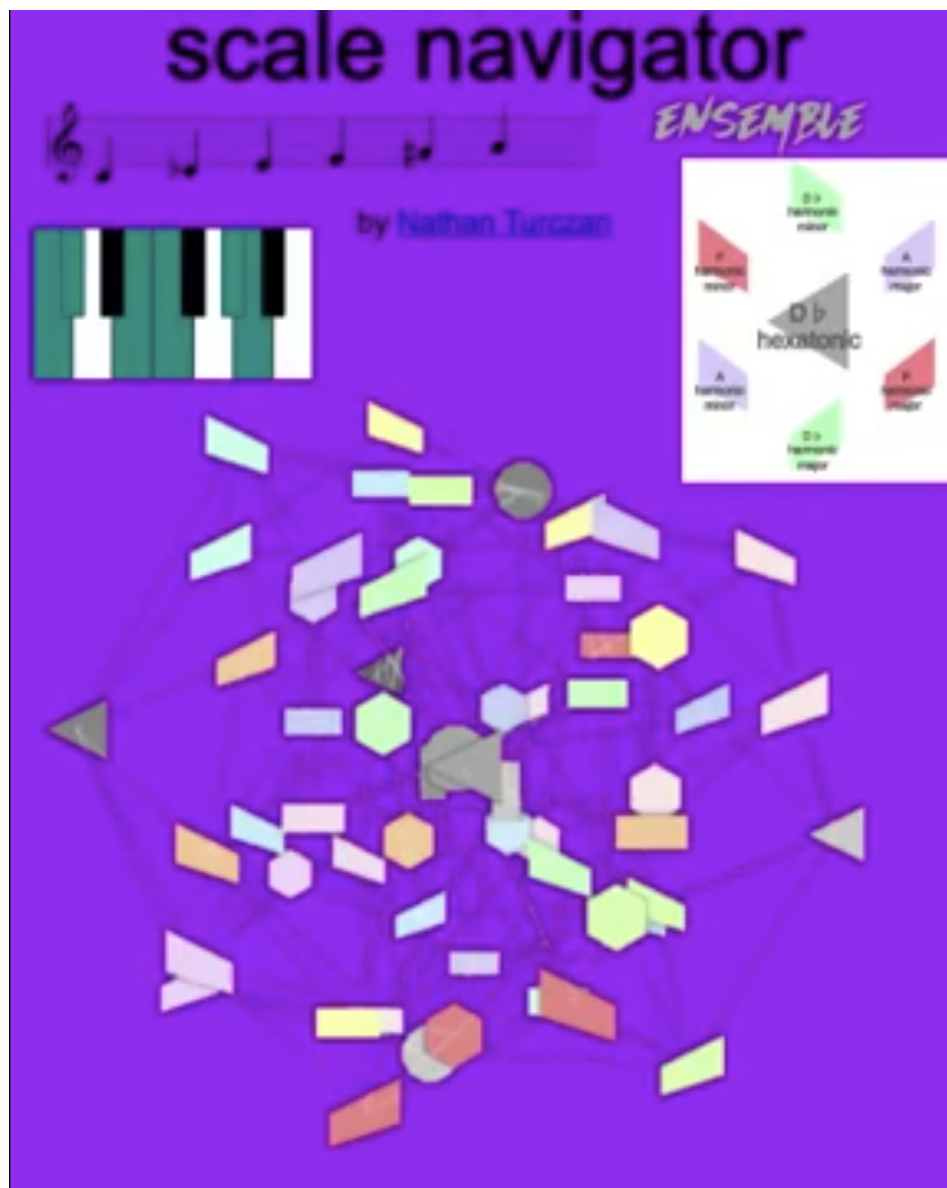

Figure 1: Screenshot of *Scale Navigator Ensemble Radio 5/5/21* livestream performance

Scale Navigator Ensemble Radio 5/5/21 was a live performance broadcast on YouTube in which I interact with Scale Navigator Dashboard (to select a scale progression) and SNaPS (to trigger samples). SNaPS (or, Scale Navigator Particle System) is a super collider backend controlled by the Scale Navigator Dashboard web interface. In SNaPS, samples transpose themselves so that they fit the harmonic context of the current scale.

2 Short Selected Improvisations with SNaPS

The following selections showcase a few ways that I use SNaPS and Scale Navigator Dashboard to improvise music.

2.1 [Scale Navigator: Improv 2021-04-18 @ 12:44pm](#)

2.2 [Scale Navigator: Improvisation 2021-04-18 12:25pm](#)
