SUMMARY

Product manager who ships end-to-end across complex hardware and software systems. Eight years defining requirements, aligning cross-functional teams, and translating intricate workflows into seamless user experiences: sensor-integrated dashboards, multi-device systems with real-time data flows, and software shipped across iOS, Android, macOS, web, and embedded plugins. Systems thinker with a complete-system approach, accounting for interdependencies and change management. MFA from CalArts; published at NIME.

EXPERIENCE

Product Manager - FutureCare 2022 - 2025

- Led product for **Wave of Wellness** (iOS/Android), a React Native dashboard integrating 5+ sensor types; when false alarms began eroding caregiver trust, aligned engineering and the sensor vendor on what was supportable, narrowed alerts to high-risk zones, and reset the product promise to match
- Synthesized inputs from **9 agency partnerships** and 80 locations into a prioritized roadmap; designed the ADL wellness scores (recency-weighted trends for sleep, activity, and bathroom use) caregivers used to decide where attention was needed
- Shipped custom **Crestron Home Driver** (published on Crestron Drivers Portal, Dec 2024); landed **Pallas Care pilot** (first enterprise agreement, executed Dec 2024)
- Coordinated cross-functional teams across hardware, software, and operations; installed and tested sensors in homes myself and designed the per-home sensor plans

Product Lead - Scale Navigator 2021 - Present

- Defined product strategy and owned requirements for a suite of music-creation tools across web, iOS, Android, macOS/Windows desktop, and DAW plugins (VST3/AU); shipped end-to-end as sole PM and developer
- Designed a **complete system architecture** with real-time data flows: one source of truth broadcasting state via MIDI and parameter automation to coordinate multiple downstream applications
- Built onboarding flows that take users from zero to productive in under 60 seconds (measured via session analytics)

  Products Shipped:
  - **Scale Navigator Dashboard** – direct-manipulation interface for navigating harmonic space; coordinates state across plugins, web, and mobile clients in real time (Web, iOS, Android, VST3, AU)
  - **Ensemble Jammer** – networked multiplayer system; interface design guarantees error-free operation for non-expert users (Web, iOS)
  - **Tonalign** – real-time MIDI pitch correction with configurable rule sets (VST3, AU)
  - **LA Laptop Orchestra** – live music participation project anchored in accessibility; 10-40 people on phones, instruments, Ableton, or livecode share one broadcast harmonic state, novices next to experts

Associate Product Manager - SPG Studios 2020 - 2021

- APM for **Remoto**, cloud ADR software for film/TV post-production; gathered feedback from 3 user types (voice actors, directors, sound engineers) and shipped unified onboarding flow

Adjunct Instructor - California Institute of the Arts 2021 - 2022

- Taught Media + Web Development (Music Technology): designed curriculum, delivered lectures, ran live demos

Composer & Interaction Designer - Freelance 2018 - Present

- **SOULS** (2022) with Sia & David OReilly – designed generative music system for 10,000 digital characters from a 21-chord vocabulary; #3 on Billboard's digital-collectibles ranking (July 2022)
- **Refik Anadol Studio**'s *WDCH Dreams* (LA Phil centennial) – data prep and sound-file tagging
- CTO, **Chordas Collective** (vocal-electronic ensemble)

SKILLS

Product: Product strategy, requirements definition, roadmap prioritization, cross-functional leadership, Agile/sprints, Figma
Build: React, TypeScript, Web Audio API, D3.js, Firebase, JUCE/C++, MIDI, real-time data systems
Domain: Hardware/software integration, sensor systems, DAW plugins (VST3/AU), user onboarding

EDUCATION

MFA, Music Technology - California Institute of the Arts 2019
BA, Vocal Performance - UC Santa Cruz 2013
Workshop in Algorithmic Computer Music - UC Santa Cruz (studied directly under David Cope) 2012

SPEAKING & PUBLICATION

Invited Lectures: Stanford CCRMA, California Institute of the Arts, Middlebury College (all 2026)
Publication: Turczan, N., et al. (2019). *The Scale Navigator: A System for Networked Algorithmic Harmony*. NIME 2019.
